Problem 3. A ball is thrown upward with a speed of 12 m/s from a height of 2 m. Find the maximum height and the time it takes to reach the ground. The graph below shows its height against time.

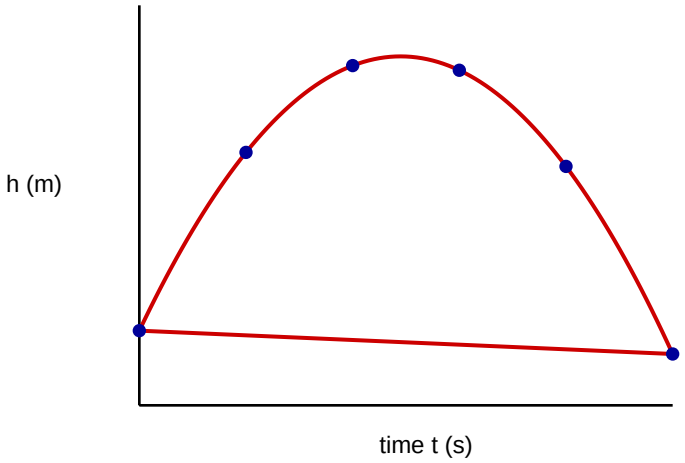

Figure 1: height of the ball against time.

Problem 3. A ball is thrown upward with a speed of 12 m/s from a height of 2 m. Find the maximum height and the time it takes to reach the ground. The graph below shows its height against time.

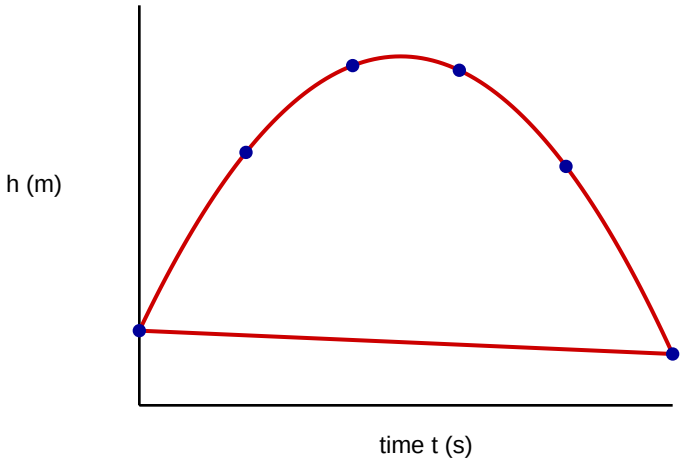

Figure 1: height of the ball against time.

Problem 3. A ball is thrown upward with a speed of 12 m/s from a height of 2 m. Find the maximum height and the time it takes to reach the ground. The graph below shows its height against time.
