
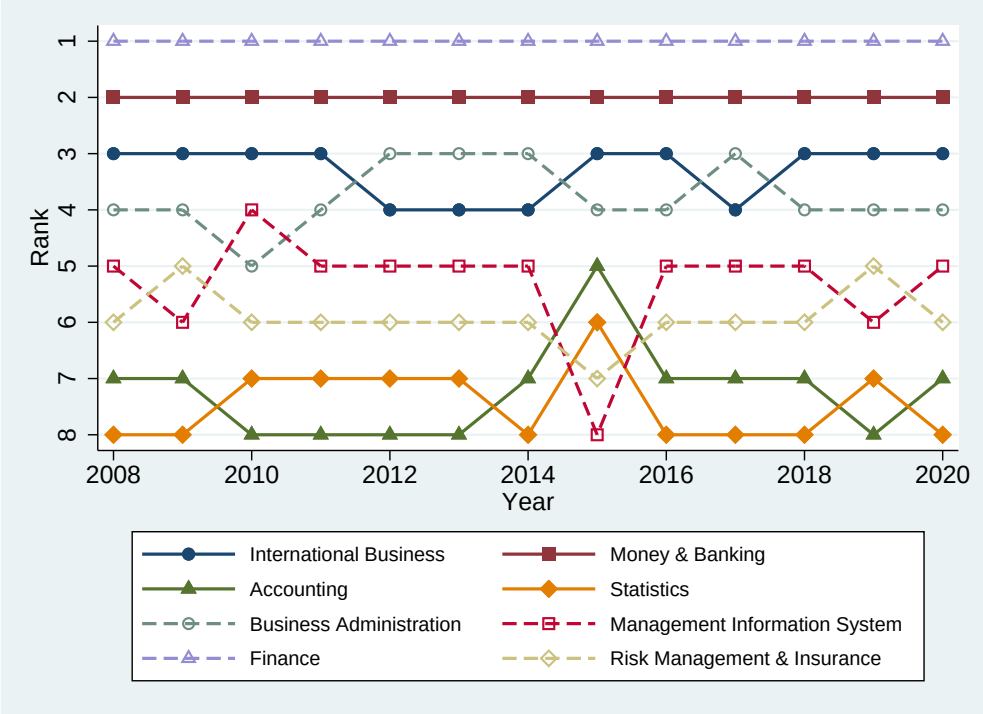

Figure 4: Rankings of Majors Based on the Exam Scores for Admission

Majors	Female	Male	Total
Business School			
International Business	1,137 (64%)	636 (36%)	1,773
Money and Banking	637 (56%)	506 (44%)	1,143
Accounting	1,284 (64%)	737 (36%)	2,021
Statistics	477 (44%)	606 (56%)	1,083
Business Administration	1,290 (60%)	872 (40%)	2,162
Management Information Systems	238 (49%)	246 (51%)	484
Finance	575 (58%)	420 (42%)	995
Risk Management and Insurance	581 (55%)	482 (45%)	1,063
Business School Total	6,219 (58%)	4,505 (42%)	10,724
Other Schools			
Arts	378 (55%)	305 (45%)	683
Social Science	773 (58%)	551 (42%)	1,324
Communication	377 (71%)	154 (29%)	531
Foreign Language and Literature	1,138 (74%)	403 (26%)	1,541
Law	177 (54%)	149 (46%)	326
Science	185 (31%)	417 (69%)	602
Other Schools Total	3,028 (60%)	1,979 (40%)	5,007
Total	9,247 (59%)	6,484 (41%)	15,731

Table 1: Number of Samples from Different Majors and Gender

		Female	Male	Total
Exam Score:	Overall Average	61.62	60.11	60.99
		(16.49)	(17.57)	(16.96)
	Average in Microeconomics	62.74	61.44	62.20
		(15.73)	(17.05)	(16.30)
	Average in Macroeconomics	60.30	58.55	59.57
		(17.26)	(18.03)	(17.60)
Academic Award:	Average Number	0.25	0.17	0.22
		(0.73)	(0.61)	(0.68)
	Probability to Receive	0.15	0.10	0.13
		(0.35)	(0.30)	(0.33)
Number of Observations per Semester		402.04	281.91	683.96

Table 2: Summary Statistics

[a.] This table shows the summary statistics of the series for different gender. Numbers in parenthesis show the standard deviation of the correpsonding series.

Sample	Full Sample		First-Year Students	
	(1)	(2)	(3)	(4)
Estimation	Pooled OLS	Random Effect	Pooled OLS	Random Effect
Regressors				
Constant	0.47***	0.41***	0.49***	0.42***
	(0.04)	(0.05)	(0.04)	(0.05)

Student's Year	Yes	Yes		
Wald Statistic	8305.30***	4045.83***	5583.46***	3002.88***
Adjusted R^2 / Between R^2	0.32	0.36	0.29	0.33
Number of Observations	15 731	13 546	12 680	11 408

Table 3: Regression Analysis of Exam Scores

[a.] This table shows the estimates analyzing the standardized exam scores described in Equation (1). Dummy variables are normalized with male first-year students majoring in international business.

[b.] Heteroscedascitity-robust standard errors are reported in parentheses and *, **, and *** indicate the significance at the 10%, 5%, and 1% level, respectively.

Regressand	Prob. of Award			Num. of Awards
	(1)	(2)	(3)	(4)
Estimation	Linear Prob.	Logit	Probit	Linear Prob.
Regressors				
Constant	0.06***	0.08***	0.09***	0.09**

Major	Yes	Yes	Yes	Yes
First-Year Students	Yes	Yes	Yes	Yes
Mean of Regressand	0.13	0.13	0.13	0.22
Wald Statistic	864.52***	723.99***	710.85***	576.09***
Adjusted R^2 / Pseudo R^2	0.10	0.15	0.15	0.09
Number of Observations	8943	8943	8943	8943

Table 4: Regression Analysis of Academic Awards

[a.] This table shows the results analyzing the probability or number of academic awards described in Equation (3) based on different estimations. Dummy variables are normalized with male first-year students majoring in international business.

[b.] The table lists the estimates for the linear probability model and corresponding marginal treatment effects for the logit and probit models.

[c.] Heteroscedascitity-robust standard errors are reported in parentheses and ** and *** indicate the significance at the 5% and 1% level, respectively.
